Integrated Shipping

Easily add carrier integration, real-time shipping rates, package management and shipment tracking to Dynamics 365 Business Central and Dynamics NAV

Streamline tedious and error-prone shipping tasks by seamlessly integrating Dynamic Ship with Microsoft Dynamics 365 Business Central and Dynamics NAV.

Shop floor employees will reduce manual entry errors by scanning packages directly into Dynamics 365 Business Central or Dynamics NAV. You will realize money and time savings by working directly with multiple carriers.

- Savings in the warehouse from streamlined processes that provide information in real-time
- Detailed package management
- Enhanced accuracy in shipping fees based on actual package dimensions
- Carrier integration with over 100 carriers
- Fully integrated with Insight Works' Warehouse Insight
- Functionality at a price point SMBs can afford
- Simple interface with scanning support

Shipment Information

Lower Shipping Costs

Real-time rates ensure proper carrier service selection and accurate customer billing. Dynamic Ship offers integration with all major domestic and international carriers. Automatically adjust and add customer freight costs to orders with simple freight pricing rules.

Accurate. Credible. Real-Time. Reliable.

Dynamic Ship provides carrier service information and rates based on package weight, dimensions, and destination. Destination addresses are validated before shipping to ensure your costs are accurate and that the shipment arrives reliably.

Simply Click and Choose!

Quote freight rates while taking an order and automatically add freight costs to the order with configurable markup rules.

LTL Support

Dynamic Ship allows you to manage pallets, bills of lading, LTL rates, and probill numbers for LTL carriers.

Capture Package Level Details

Capture serial numbers, lot numbers, and assembly component details at packing time and increase shipping accuracy by scanning items and comparing them to the sales order and picking document.

Accountability

Place an accurate value on each package in a shipment, report what items are in each box, inform customers what is in each package, and where the package is throughout the entire process.

Package Tracking

Dynamic Ship provides real-time shipment updates across 100+ carriers.

Intelligent Delivery Estimates

Dynamic Ship bolsters carrier-generated estimated delivery dates with proprietary tracking intelligence.
