

Product Configurator

Configure Price Quote

Product Configurator is an add-on for Business Central that simplifies the creation of production BOMs and Routings to make Quote and Order generation more efficient.

Define product categories and options to allow sales personnel to easily select options to build new products or reuse existing configurations.

- Save users significant time when quoting or designing products
- Reduce manual input and improve efficiency and accuracy in sales quotes and orders
- Simplify the ordering and quote process for staff
- Automatically generate Assembly or Production BOMs/Routings on Sales Orders and Quotes
- Integrate with standard Business Central MPS and MRP to properly plan your new products

Item Categor...	Code	Description	Display Order	Mandatory	Hidden in Configurat...	Bulk Edit Action
DESK	FINISH	Finish	1	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Show Choice
DESK	LENGTH	Length	2	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Show Quantity
DESK	DOORS	Doors	3	<input type="checkbox"/>	<input type="checkbox"/>	Show All
DESK	SHELVES	Shelves	4	<input type="checkbox"/>	<input type="checkbox"/>	Show All
DESK	PRICE	Base Price	5	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Hide
DESK	HEIGHT	Height	6	<input type="checkbox"/>	<input type="checkbox"/>	Show Quantity
DESK	TRIM	Trim	7	<input type="checkbox"/>	<input type="checkbox"/>	Show All

Reduce time & increase accuracy

With Product Configurator, it is easy to set-up and select specific options for products that you sell. Whether you assemble or produce simple items with only a few configurable options or more complex items with thousands of options, Product Configurator reduces data entry time while increasing order accuracy.

Easily build Sales Quotes and Orders

Users can choose a base item to configure or select an item that has already been customized and make modifications to it. As users alter the item, the retail price is automatically calculated for easy quoting.

Automatically generate BOMs and Routings

With Product Configurator you no longer need to individually account for every item and part that goes into your products. An assembly or production BOM is generated behind-the-scenes whenever a new item is configured saving you time and increasing accuracy.

Easy-to-Use Interface

Product Configurator is easy to use with a simple interface to add and configure line item options. Depending on permissions, anyone can create and configure options easily. Users see the entire set of options simultaneously, so they get the full visibility into what they're designing at all times.

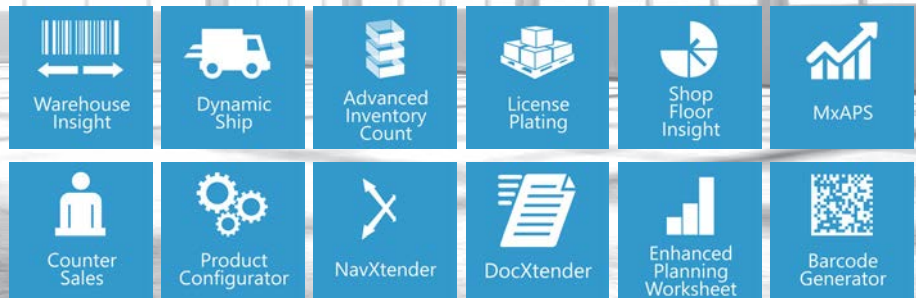

Simple Setup

Product Configurator easily integrates with Dynamics 365 Business Central and takes very little effort to set up and start using.

Affordable Solution

You don't need to be a big shop to afford or justify Product Configurator. This add-on is an affordable solution for any size business.
